AMBASSADOR HUB

STEM Ambassador Hub West England

The WE STEM Hub West England has 12 Mindstorm EV3 kits that can be borrowed by schools or Groups in the Bristol area, with the support of a local STEM Ambassador.

Are you interested in a Lego robotics workshop for your Guides? Each workshop can be for up to 36 girls and anything from 2 hours to a full day depending on your requirements and capacity and the availability of our local volunteers to run the session. Each session will involve some design and build and basic programming to solve a simple challenge. Longer sessions will utilise sensor and more complex coding, but all accessible to newcomers and experts alike.

Please get in touch to discuss your requirements.
